EXECUTIVE SUMMARY

A versatile JavaScript and Blockchain Developer with 4+ years of hands-on experience designing scalable backend services, decentralized applications, and secure smart contracts. Strong foundation in **Node.js**, **Express**, and **RESTful API development**, integrating on-chain and off-chain systems.

Proven ability to build full-stack applications using **React.js**, **Solidity**, **Hardhat**, and **Web3.js/Ethers.js**.

Experienced with **AWS cloud infrastructure**, **microservices**, and performance-monitoring tools.

Passionate about combining modern **JavaScript ecosystems** with decentralized technologies to deliver efficient, secure, and production-ready solutions.

EXPERIENCE

AUG 2024 – PRESENT

BLOCKCHAIN DEVELOPER, AI TECH SOLUTIONS LIMITED.

- Creating **Escrow Smart Contracts** to securely hold and release client and freelancer funds based on project milestones.
- Developing and deploying **Ethereum-based payment gateway modules** integrated with Escrow and Oracle systems for multi-currency support.
- Collaborating with backend teams to **implement decentralized payment workflows** using Solidity, Hardhat, and [ether.js](#).
- Collaborated with backend teams to design **API-driven workflows** connecting front-end and blockchain layers.
- Wrote **automated unit and integration tests** (Mocha/Chai) to ensure security, scalability, and audit compliance.
- Optimized contract gas costs and improved deployment pipelines on **Polygon** and **Ethereum** testnets via **Hardhat**.

SKILLS

- Node.js, Express.js, JavaScript (ES6+), Solidity, Hardhat, Ethers.js, REST API, AWS, Git.

JAN 2022 – JUNE 2024

BLOCKCHAIN DEVELOPER, GATHER SOFTWARE PVT. LTD.

- Led development of **Node.js-based monitoring and automation services** for blockchain transactions.
- Built **front-end dashboards** with **Vue.js** and integrated **Web3.js** for on-chain interactions.
- Contributed to a **Solana-based blockchain fork** and implemented native token logic using Rust.
- Developed **Staking and Masternode DApps** using **Solidity**, **Hardhat**, and **Node.js scripts** for backend automation.
- Improved team productivity by introducing JS-based build scripts and performance benchmarking tools..

SKILLS

- Node.js, JavaScript, Solidity, Web3.js, TypeScript, Vue.js, Rust, AWS, Git, Shell scripting .

APR 2020 – OCT 2021

JUNIOR BLOCKCHAIN DEVELOPER, SODIO TECHNOLOGY PVT. LTD.

- Performed initial client assessment and analysis to begin the research process.
- Writing and deploying the smart contracts on solidity and platform –Ethereum.
- Developing REST-based services to improve the user- experience with respect to the interface.

SKILLS

- **Programming Language:** C, Java, JavaScript, and Solidity.
- **Ethereum Tool:** Ganache, Remix IDE, Truffle.

PUBLICATION

Sandip Singh, M. Edison “*A compact 3rd Order SIW Filter with Improved Upper Band Performance for Ku-Band Application*”, International Conference on Innovation in Electronics, Signal Processing and Communication (IESC) IEEE 2019.

EDUCATION

JULY 2016 - JUNE 2018

MASTER OF TECHNOLOGY, NERIST, ARUNACHAL PRADESH.

7.74 GPA in Electronics and Communication.

JULY 2012 - JUNE 2016

BACHELOR OF TECHNOLOGY, SHIATS, PRAYAGRAJ, UTTAR PRADESH.

7.3 GPA in Electronics and Communication.
